

Magic Genie Demonstration Worksheet

Discussion Questions

1	Describe	what l	hannanad	in ·	thic	demonstration.
Ι.	Describe	wnat i	nabbened	m	tnis	demonstration.

2. Write the chemical equation for the decomposition of hydrogen peroxide. Include heat in the equation, after determining if the reaction was endothermic or exothermic. *Hint:* The towel was necessary to hold the flask because the flask got very hot.

3. What is a catalyst? Name the catalyst in this demonstration. Could it be included as a reactant in the chemical equation?

4. In general terms, how does a catalyst work?
